NETSUPPORT DNA

Effective low-cost IT Asset Management

Save Time

From proactive warning alerts of issues across the network, to device auto-discovery; bulk software distribution; and mobile apps so you can access key data on the move, NetSupport DNA saves you a whole heap of time.

Save Money

With its constant supply of real-time statistics to help you manage your assets and avoid system downtime and its associated costs, NetSupport DNA ensures you achieve a swift return on your investment.

Add Security

NetSupport DNA supplies you with the essential tools to safeguard your systems and shield them from security threats - whether external or internal - keeping your organisation's IT systems secure and running efficiently.

Device Auto-discovery

Receive notifications of any new devices that join the network and choose whether to deploy an agent automatically.

Hardware Inventory

Provides one of the most comprehensive and detailed Hardware Inventory and change tracking modules available on the market today.

SNMP Discovery

Scan a range of network addresses and report on any SNMP devices discovered. Create Alerts to monitor the devices.

Software Licensing

Designed to help companies manage licence compliance and reduce software overspend by reporting and tracking installed software.

Web/App Metering

Control which websites and applications users have access to. Provides the tools to restrict where and when they can be used.

Enterprise Alerting

A powerful and flexible Alerting module featuring over 100 alert types provides proactive monitoring of the company network.

User Management

A range of features to support staff, including AD account management, user acceptance policies and much more.

Remote Control (optional)

Integrate NetSupport Manager Remote Control to leverage full real-time remote access across the enterprise.

Software Distribution

Provides multi-delivery Software Distribution. "Push" packages instantly or publish packages for departments to "pull" down.

Power Management

Provides both a detailed summary of energy usage and the ability to schedule power management policies for selected office PCs.

Endpoint Security

A robust and effective solution for managing the use of USB memory sticks to help maintain the security of the network.

Explorer Mode

Gain a real-time summary of all your PCs in three formats: Icon, Details or Thumbnail view.

Custom Reporting

On-screen, print-optimised, query-based and "live" drill down reporting capabilities are included as standard.

Mobile Inventory

Search or scan a barcode to access inventory and alert details for any PC using the mobile app for Android and iOS devices.

Secure Vault

The secure Vault component allows secure storage of confidential IT data.

Low Cost

Budget friendly, NetSupport DNA is a low-cost but effective solution. Try today using our free trial.
