NetSupport DNA
Licences

We work within the
Corporate Sector

How is the software currently being used in your organisation?

At the moment, we are using NetSupport DNA primarily to monitor how software licences are being used across our organisation. The software inventory shows us where software is installed, when it's used and who by, plus which licences aren't being used, where they can be better deployed.

The challenges we were trying to solve:

We were looking for a solution that could help us understand where our software licences were deployed without manually having to review each PC. With this information, it helps us reduce software overspend by company and department.

Why did you choose our product?

- | | |
|--|--|
| <input checked="" type="checkbox"/> Cost | <input checked="" type="checkbox"/> Features |
| <input checked="" type="checkbox"/> Easy to use | <input type="checkbox"/> Security |
| <input type="checkbox"/> Platform support | <input type="checkbox"/> Other |
| <input checked="" type="checkbox"/> Recommendation | |

The software offered additional features over others that we looked at. It also has the potential to bolt on other complementary products later if we decided to.

It's great - keep going!

How/where has NetSupport added value?

- Saved money
- Increased productivity
- Saves time
- Flexibility
- Performance
- Easy to use
- Other

We use DNA to create an audit trail for software and hardware purchases.

Would you recommend NetSupport?

- Yes No

“ It's great - keep going! ”
