NetSupport DNA
Licences

We work within the
Education Sector

How is the software currently being used in your organisation?

We mainly use NetSupport DNA to capture data about the school's IT hardware and software usage using the inventories.

The challenges we were trying to solve:

We wanted a solution that would allow us to record an inventory of our assets and show what versions of software were installed, as well as a way to help with deployments to multiple devices.

Why did you choose our product?

- | | |
|---|--|
| <input checked="" type="checkbox"/> Cost | <input checked="" type="checkbox"/> Features |
| <input type="checkbox"/> Easy to use | <input type="checkbox"/> Security |
| <input type="checkbox"/> Platform support | <input type="checkbox"/> Other |
| <input type="checkbox"/> Recommendation | |

We chose the product for its hardware and software inventory features. It provides up-to-date information on all devices, allowing us to see what items need re-deploying or replacing. This information is collected automatically and so saves us time having to manually collect it.

How/where has NetSupport added value?

- Saved money
- Increased productivity
- Saves time
- Flexibility
- Performance
- Easy to use
- Other

The information gathered from the devices is already starting to be of use as it highlights where assets can be better utilised.

Would you recommend NetSupport?

- Yes No

“ The information gathered...is already starting to be of use ”
