We work within the Education Sector

How is the software currently being used in your organisation?

With NetSupport School we are now able to present effectively to students by sharing our screen and using the real-time instruction tools and monitor student activity using the monitoring feature, which highlight all students PCs.

The challenges we were trying to solve:

Trying to control the student behaviour [in ICT lessons] was proving very tiring, so we set our minds on finding a solution which would help keep students on track, such as the blocking features and controlling student screens in NetSupport School. These help the teachers to immediately see and stop any students not on task.

Why did you choose our product?

- [ ] Cost
- [x] Easy to use
- [ ] Platform support
- [ ] Recommendation
- [x] Features
- [ ] Security
- [ ] Other

We were aware that NetSupport had been involved in many educational projects across Africa and we were introduced to NetSupport School. We were overjoyed when we saw the features the software provided!

Monitoring all the students from the teacher's PC immediately made life so much easier – and when we have important materials to present to the class, we simply load this on the teacher machine and broadcast it direct to each student PC.

How/where has NetSupport added value?

- [ ] Saved money
- [x] Increased productivity
- [ ] Saves time
- [ ] Flexibility
- [ ] Performance
- [x] Easy to use
- [ ] Other

Our experiences dealing with the NetSupport team have also been fantastic.

Would you recommend NetSupport?
